EXCHANGE ITEMS - PLEASE RETURN YOUR OLD UNIT TO THE CLUB

Exchange items are essential for the club to be able to continue to provide some spares where the item is no longer available. By returning your old unit to us, when you purchase an Exchange item, ensures the future supply for other members. All the items marked as "Exchange" require a surcharge to be paid of £100 per item. When a suitable exchange item is received by the Spares Team your surcharge will be refunded. Some Exchange items will require you to send your old unit to us before we will dispatch the reconditioned item. This is due to members leaving their surcharge with us, this leaves the stock low on suitable units to be reconditioned. In these circumstances no surcharge will be required to be paid. Please contact Pete if an item marked Exchange is required.

NEWS

The Spares Scheme will be CLOSED for 2 weeks after the National Rally in August for Annual stock check, 2 weeks at Christmas and 2 weeks during the year for annual holiday, times to be announced on the Facebook Group and website

RECOGNISING YOUR BRAKE CALIPER

Over the years we have had several requests for Brake Calipers and some have taken a lot of communication to sort out. There were 3 types of caliper available for the Cortina Mk2 :

14LF - These are fitted on the Standard, Deluxe and Super models

16P and 16PB - These are fitted to the GT, 1600E and Lotus models.

The problem is the 16P and 16PB calipers both have 16P cast in to them but there is a difference and you can tell them apart.

The 16P has a larger piston rubber seal whereas the 16PB has a small seal but also has a metal band as an additional retainer.

See photos for reference.

You may find your calipers have M16 cast into them. These are more modern calipers and are metric.

They do fit the Cortina Mk2, they have a bigger surface area pad but have smaller pins to retain the pads.

As they are not original for the car the club does not cater for the M16 version but if enough demand is out there this could change in the future.
